

Executive Information System Development Environment

CLIENT

Pilot Software is a leading provider of operational performance management solutions offers a powerful combination of domain expertise, a proven approach and award-winning software that enable organizations to rapidly achieve objectives by aligning execution with strategy. Pilot's rich history of leadership has garnered worldwide recognition for Pilot Software's technology, including most recently being named to the DM Review 100 list as one of the top 100 performance management companies.

SOLUTION

Command Center Plus (CCPlus) is a software development environment, that provides the tools needed to create and support an Executive Information System (EIS). An EIS serves the information needs of top executives and provides rapid access to timely information and direct access to management menus, reports and charts, detailing the operations of their company.

Key features:

- + Valuable compiler for CCPlus programming language processing;
- + Powerful tools that display data graphically;
- + Internal database, supporting many tables with time-series records and “drill-down” capability;
- + SQL interface to Oracle , Ingres and Sybase, enabling data capture from external sources;
- + Multi-Platform support for CCPlus Server (HP-UX, AIX, MVS, Alpha VMS, VAX VMS) and for CCPlus Client (Windows 3.1, Windows 95/98, Windows NT 3.51/4.0 and Apple Mac 7.
Powerful tools that display data graphically;
