Electronic Distribution System for Complex Documents—Maintenance and Re-engineering

Client

Interleaf, Inc., a developer of software products used for the electronic assembly, management, retrieval, publishing and distribution of business documents, targeting publishing and enterprise content management markets. Since 2000, Interleaf has been a division of BroadVision, a global provider of personal self-service web applications and a leading e-commerce solution vendor, is widely recognized as a pioneer and innovator in personalization and web-based interactions, transactions, and process enablement.

Solution

WorldView is the only electronic distribution system designed for long, complex documents. Its powerful production engine (WorldView Press) enables the assembly of numerous types of data with the later transformation into meaningful collections that can be distributed electronically and viewed by WorldView Viewer under a wide variety of standard computing environments including UNIX and Windows. With WorldView, custom electronic distribution applications can be developed, that provide instant access to business-critical information.

Auriga's Contribution

- Y2K compliant release of WorldView Press;
- Interleaf 7.0.2 files support;
- Windows long file names support;
- Windows 98 support;
- hatches and bug fixes applied.

Implementation

Hardware and OS: Sun SPARC with SunOS 4.1.4 or Solaris 2.6, HP 9000 Series 700 or 800 with HP-UX 10.20, RS/6000 with AIX 4.2.1 or 4.3, Intel PC with Windows 95, 98, or NT 4.0
