# Software Testing

---

## Client

Interleaf, Inc., a developer of software products used for the electronic assembly, management, retrieval, publishing and distribution of business documents, targeting publishing and enterprise content management markets. Since 2000, Interleaf has been a division of BroadVision, a global provider of personal self-service web applications and a leading e-commerce solution vendor, is widely recognized as a pioneer and innovator in personalization and web-based interactions, transactions, and process enablement.

## Solution

Auriga was responsible for the development of testing policy, test plans, test suites for autotests, and checklists for each stage of software development. Industry-standard instrumental tools for source code testing, memory and process errors detecting, visual testing, and tests automating are used. The system, developed within the frameworks of this project, also provides tools to support bugs database and a user-friendly environment to develop applications.

## Implementation

Hardware, Os's and tools: Sun, HP, DEC, SGI, MS Windows NT 3.51/4.0, Windows 95/98/2000, Rational Purify, Rational Quantify, SilkTest
