Client's Proprietary Software Server Platform Year2000 Project

Client

A major UNIX OS manufacturer, a leading provider of software technology for distributed, embedded and network-based systems, offering its targeted solutions for small to medium business, enterprise applications, and digital network services for the companies worldwide.

Solution

The client's proprietary server software platform systems are the world's popular UNIX server operating systems. This platform's resellers deliver high quality UNIX applications on the Intel processor-based hardware platform.

Auriga's Contribution

Several components of this software distribution were developed during the project, including:

- Adopted IMAP4 server;
- UnixWare packaging utilities (were ported to the proprietary platform);
- Sendmail 8.8.8 was productized;
- Network installation support software was enhanced;
- Special attention was paid to testing the software;
- The software was delivered with appropriate documentation.

Implementation

C, Visual Tcl, sh
